CONFLICT RESOLUTION

Conflict Resolution is a concentration of courses aimed at developing core competencies for reflective scholars/practitioners. It is offered both as a track in the Master of Arts and Doctoral programs in Social-Organizational Psychology and, in whole or in part, as a complement to the studies of students throughout the College. The courses are offered by the International Center for Cooperation and Conflict Resolution (ICCCR), whose mission is to help individuals, schools, communities, businesses and governments better understand the nature of conflict and how to achieve its constructive resolution.

Advanced Certificate in Cooperation and Conflict Resolution

Students interested in receiving an Advanced Certificate in Cooperation and Conflict Resolution must complete a sequence of six courses:

- ORLJ 5340 Basic practicum in conflict resolution and mediation
- ORLJ 6040 Fundamentals of cooperation, conflict resolution and mediation in different institutional settings
- ORLJ 6350 Advanced practicum in conflict resolution, Part I and II
- ORLJ Elective An ICCCR-sponsored elective course; electives vary semester to semester
- ORLJ 5012 Organizational internship (in community mediation or an organizational setting)

For more information regarding graduate studies in cooperation and conflict resolution, visit our website: www.tc.edu/iccr. If you have questions, please contact the ICCCR office at (212) 678-3402, or email us: iccr@tc.edu.

Note: Students who take these courses on a non-credit basis will be awarded a Cooperation and Conflict Resolution Certificate of Completion.

CONTINUING PROFESSIONAL STUDIES

Teachers College, Columbia University's Continuing Professional Studies (CPS) offers non-credit programs that are designed to take both a practical and innovative approach to professional development and learning.

We offer educational and corporate development programs that leverage TC's world-renowned faculty and thought leadership in our four core areas of expertise: health, education, leadership, and psychology.

TC's CPS programs are delivered in a variety of convenient formats that include:

- Short-format workshops
- Professional certificate programs
- Leading-edge conferences
- E-learning
- Custom programs

The Continuing Professional Studies team at Teachers College, Columbia University partners with outside organizations to design, develop, and implement customized professional development programs.

TC's Custom Programs are tailored to achieve specific organizational objectives and are held at the Teachers College, Columbia University campus in New York City, or at a location of your choice.

Organizations attending Teachers College, Columbia University's Continuing Professional Studies programs have included: Pfizer, Merck, J.P. Morgan, Morgan Stanley, NYC Department of Education, GE, Citibank, IBM, The U.S. State Department, West Point Military Academy, The United Nations, and Schreiber Foods.

Please see <http://www.tc.columbia.edu/cps> for a complete listing of our offerings.

FAMILY AND COMMUNITY EDUCATION

Teachers College has long recognized that the family is a fundamental educational institution. Those concerned with education can benefit from considering how education proceeds within families and how families are linked with other educational institutions in the community: e.g., schools, daycare centers, healthcare and social service agencies, the media, libraries and museums, parks, and religious institutions. Values, attitudes, norms, self-concepts, and expectations are formed, sustained, and modified in families as different generations teach and learn from each other through observation, participation, and instruction.

Families also mediate and thereby transform the influences of other educational institutions on their members. Since education takes place in a broad range of institutional and interpersonal settings, it is also important to understand how individuals engage in, move through, and combine these various educational experiences over a lifetime. Moreover, efforts to improve education often entail attempts to change families or their connections with other institutions. Thus, an understanding of families is significant for educational policy, practice, and research. Families are subject to numerous sources of change. The household composition, interpersonal relationships, and kin networks of the same family may change significantly from one stage of the life-cycle to another and in connection with geographic and social mobility. During periods of rapid demographic, economic, and technological change, it becomes especially important for educators to examine families and to consider such issues as how new forms of transportation and communication technology are modifying information processing in family settings.

Given the complex connections of families with other institutions in the community, the variety of forms of the family in modern societies, and the numerous teaching and learning activities that take place in family settings, insights from a wide range of scholarly disciplines can be utilized in attempting to understand and help shape the educational role of modern families. Teachers College has a distinguished tradition of study and research on families and communities as educators.

The Elbenwood Center for the Study of the Family as Educator (Professor Hope Jensen Leichter, Director), The Institute for Urban and Minority Education, (Professor Ernest Morrell, Director), The Rita Gold Early Childhood Center (Professor Susan Recchia, Faculty Director), the Center for Children and Families (Professors Sharon Lynn Kagan and Jeanne Brooks-Gunn, Co-Directors), and several departments within the college offer opportunities for study and research related to families. Additional opportunities for the interdisciplinary study of families and communities as educators can be arranged with advisors.

Students interested in including elective studies in Family and Community Education in their degree programs should talk with Professor Hope Jensen Leichter. Other interested faculty members include:

- Professor Jeanne Brooks-Gunn
- Professor Sharon L. Kagan
- Professor Michelle Knight-Diop
- Professor Victoria J. Marsick
- Professor Susan Recchia
- Professor Hervé Varenne
- Professor Barbara Wallace

INTERDISCIPLINARY STUDIES IN EDUCATION

This program is designed for students who have interests in an area of specialization not offered at the College, but for which a coherent and integrated program may be developed through the selection of a combination of current course offerings from several different disciplines or programs at Teachers College.

Limited to areas of study at Teachers College, admission to the Interdisciplinary Studies in Education program is granted only if the designed program of study cannot be pursued through one of the established areas of specialization, many of which have a sufficient degree of flexibility to permit an interdisciplinary approach to a field of study. All Teachers College professors are eligible to serve as advisors and the applicant is required to seek the support of a minimum of two advisors from the relevant disciplines represented in the proposed program of study as part of the application process. For the M.A. or Ed.M. degree a comprehensive examination, essay, or special integrative project is required.

Contact the Admission Office (212) 678-3710 for a more detailed description of the program and procedures for applying.

LAW AND EDUCATIONAL INSTITUTIONS

CONTACT INFORMATION

Email: jay.heubert@columbia.edu

In schools and postsecondary institutions, public and private, legal considerations play a central role in questions of educational governance, finance, curriculum, instruction, admission, staffing, accountability, equality of opportunity, and school reform. It is therefore important for policy analysts, administrators, policy makers, advocates, teachers, and communities to understand law in its many forms – constitutional provisions, statutes, regulations, policies, court decisions, administrative regulations, and collective bargaining agreements, among others. There is also a growing need for effective collaboration between educators, lawyers, and researchers; such collaboration not only helps avoid costly and divisive litigation but provides a powerful tool that can be used to advance important educational objectives.

This is not a degree program, nor is it a certificate program. Coursework in education law can be taken in connection with degree programs in most Teachers College departments. For course descriptions, please see course listing in the [Department of Education Policy and Social Analysis](#).

EDPA 4086 Law and education: Regulation, religion, free speech, and safety (3)

Professor Heubert or Professor Sigall.

EDPA 5016 Educational equality: The role of law (3)

Professor Heubert or Professor Sigall.

EDPA 4033 Comprehensive Educational Opportunity (3)

Professor Rebell.

EDPA 5880 School Law Institute (3)

Professors Heubert, Rebell, and a national faculty.

Various topics courses, including Social Science, Education Policy, and the Courts (3)

Professor Heubert and/or Professor Rebell.

For further information, contact Professor Jay P. Heubert at

jay.heubert@columbia.edu.

URBAN EDUCATION

Through its various departments and programs, Teachers College, located in the heart of one of the world's largest cities, has a wide range of opportunities for instruction, research, and service in the field of urban education. Individual programs of study can be arranged for students whose major interest is in this area— teaching, bilingual education, counseling, administration, supervision, special education, research, teacher education, and other professional roles. Special attention is given to prospective teachers and other school personnel; to persons with leadership responsibility for educational planning and program development; and to individuals interested in research and experimentation.

Most departments and programs at Teachers College give special attention to students primarily concerned with education in the urban setting. In addition to courses which focus primarily on urban education, many courses include attention to education in urban settings.

For study possibilities, students should contact the coordinator of the program in which their professional interests lie. The Ed.D. program in Curriculum and Teaching offers a concentration in Urban Education for those primarily concerned with instruction, whether in schools or in other educational environments.

Teachers College is also involved in educational program development and evaluation of urban programs. This research-service function is carried on with selected New York City schools and with other school systems in metropolitan areas.

Of particular interest in this regard is the Institute for Urban and Minority Education, which gives special emphasis to research, development, training and service programs designed to improve education in the nation's cities and for minority group members.

The Institute investigates a wide range of factors that influence educational success and failure. It provides technical assistance to schools; opportunities for students and faculty to engage in research and development activities; and, supervised and independent study jointly arranged between the Institute and appropriate academic departments.

For further information, address inquiries to the department chair of the area of specialization.

General offering:

IND 4033. Problems and programs in urban education (2-3)
Knowledge, insights, and understandings emerging from theory, research, and practice, concerning urban education.
